We launched this Forum with the desire to intensify knowledge exchange and networking of experts from different countries to strengthen our democracy and protect our freedoms and societies from modern hybrid threats. This is the 6th ZSF that we must thank to our co-organizers from Croatia and abroad, as well as our sponsors, partners, and donors.

We asked these two recognized and well-known photographers to share with us their impressions of the consequences of Russian aggression against Ukraine in 2014 and 2022. The photos show sadness, longing, human losses, personal tragedies, but also hope, strength, idea and vision for future recovery of Ukrainian society and the state in a democratic environment. And an incentive for Ukraine to join the EU and NATO. Following the example of Croatia.

Together we are stronger and more resilient.
